

Dear Horticulture Professionals,

Join other horticultural professionals for the **2020 Landscape and Grounds Maintenance Short Course**. Our goal is to provide timely information and educational programming that will allow you to improve the quality of service and profitability of your horticultural business. Although this course is designed for people in the horticulture industry, all interested individuals are welcome.

There are four weekly sessions beginning Friday, February 7th. The sessions start at 1:00 p.m. and end at 4:00 p.m. on Fridays: February 7, 14, 21 and 28.

The registration fee for all four sessions is \$40 per person. If three or more people from the same organization are attending all sessions, the cost is \$35 per person. If you are only interested in taking selected sessions, the cost is \$15.00 per session. This course offers you a unique and inexpensive educational opportunity for the latest horticultural information and updates. We hope that you will be able to attend.

CEUs Available

This Short Course is also offered in Milwaukee and Waukesha Counties.

If you have any questions, please contact Mike Ballweg at the Extension Sheboygan County office at (920) 459-5904.

Sincerely,

Mike Ballweg
Extension Agricultural Agent
Sheboygan County

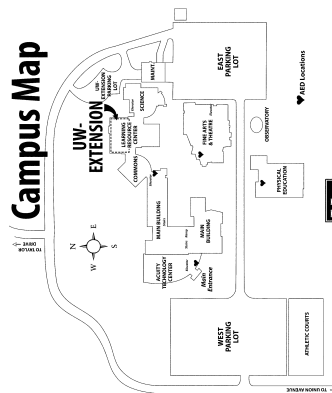

To insure equal access, please make requests for reasonable accommodations as soon as possible prior to the scheduled program, service or activity. If you need this material in another format please contact the program coordinator.

UNIVERSITY OF WISCONSIN-MADISON

2020 Landscape & Grounds Maintenance Short Course

Week 1 - Friday, February 7 - 1:00 pm

♦ **Advancing Tree Risk Mitigation Through Basic Tree Care**

Providing basic tree care reduces the threat to long term tree health. Which practices help ensure healthy trees?

Rich Hauer, Professor, UW-Stevens Point

♦ **Abiotic Turf Issues and Glyphosate Alternatives**

Know the clues to sort through whether turf issues are biotic or abiotic. How effective are Glyphosate alternatives?

Paul Koch, UW-Madison Extension Turfgrass Specialist

Week 2 - Friday, February 14 - 1:00 pm

♦ **Managing Wildlife in the Landscape**

Wildlife management involves the manipulation of habitat and populations to achieve a desired goal. The goal may be to increase a particular wildlife population but can also be to decrease a wildlife population that is causing excessive damage. Gain insights into useful strategies.

David Drake, UW-Madison Extension Wildlife Specialist

♦ **The Big Chill: Cold Temperature Effects on Plants and How to Avoid Damage**

Learn about standard practices to mitigate the impacts of cold temperatures on landscape plants.

Laura Jull, UW-Madison Extension Woody Plants Specialist

Week 3 - Friday, February 21 - 1:00 pm

♦ **Working Backwards: Understanding Clues from Plant Damage to Identify Insect Pests**

Insect feeding damage to plants can tell us much about the pests we are dealing with. Learn about what the clues are telling us.

PJ Liesch, UW-Madison Extension Entomologist

♦ **Landscape Plants for Shade**

Right Plant Right Place.

Dave Wanniger, Horticulturist in Charge, Boerner Botanical Gardens

Week 4 - Friday, February 28 - 1:00 pm

♦ **New and Upcoming Herbaceous Perennials**

Current trends in herbaceous plants and new plants for a wide range of garden applications.

Nancy Nedveck, Owner, The Flower Factory, Stoughton

♦ **New and Emerging Landscape Plant Diseases**

The impact of plant diseases can be very significant. Learn about new and emerging landscape plant diseases to be on the lookout for.

Brian Hudelson, Director, Plant Disease Diagnostic Clinic, UW-Madison
