

# Wisconsin Spring Wildflower Search

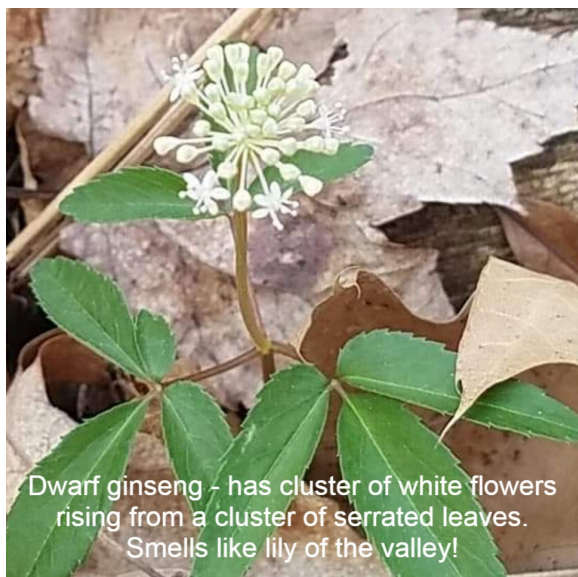

All of these wildflowers can be found at Camp Riversite as all of these photos were taken there! How many are you able to find? Post your results and a picture of your family's search on Exploring Your Environment facebook page.

Wood violet - 5 petals ranging from deep violet to nearly white. Heart-shaped leaves. Bloom from spring to fall.

Bloodroot - 8 brilliant white petals. Bud emerges then flowers from tightly wrapped leaf. Scalloped leaves.

Dwarf ginseng - has cluster of white flowers rising from a cluster of serrated leaves. Smells like lily of the valley!

Hepatica - petals from 6-20, heart-shaped leaves at base. Purple, white, or pink.

Trillium - White with yellow stamen, three petals, sepals, and leaves

Bellwort - 1-4 hanging flowers on a stem, 6 petals. Long, narrow leaves.
