

**Dear Horticulture Professionals,**

Join other horticultural professionals for the:  
**2022 Landscape and Grounds Maintenance Short Course.**

Our goal is to provide timely information and educational programming that will allow you to improve the quality of service and profitability of your horticultural business. All interested individuals are welcome.

Participants will receive a unique Zoom link via the email provided at registration time for each session enrolled. The unique link cannot be shared with others and accessed with only one device during the session.

There are four weekly virtual sessions beginning Wednesday, February 2nd. The sessions start at 1:00 p.m. and end by 4:00 p.m. on Wednesdays: February 2, 9, 16 and 23.

**For more information, speaker bios, online registration and payment visit:**  
[go.wisc.edu/SheboyganLGMSC](http://go.wisc.edu/SheboyganLGMSC)

CEUs are available for ISA arborists and NALP landscape professionals. Join this program to learn and interact with speakers online!

### Week 1: Wednesday February 2

**1:00 p.m. - Cankers and Vascular Wilts of Landscape Trees**

Learn about common vascular wilt and canker diseases of trees and shrubs.

*Dr. Brian Hudelson, Director, Plant Disease Diagnostic Clinic, UW-Madison Extension*

**2:15 p.m. - Drought Tolerant Trees and Shrubs**

This talk will focus on general plant choices for dry sites, as well as specific plants for unique applications.

*Erik Desotelle, Wholesale Sales, Johnson Nursery*

### Week 2: Wednesday February 9

**1:00 p.m. - Invasive Woody Plants and Alternative Plants to Use in the Landscape**

Review alternatives for invasive woody plants and highlight their ornamental characteristics, such as showy fall color, form, flower and fruit production, and value to pollinators and wildlife.

*Dr. Laura Jull, Associate Professor, UW-Madison*

**2:15 p.m. - Designing with Annuals**

This presentation will examine a wide range of annuals for sun and shade and examine scenarios for their best use.

*Mark Dwyer, Owner/Operator Landscape Prescriptions by MD*

### Week 3: Wednesday February 16

**1:00 p.m. - Insect Defoliators of Landscape Trees and Shrubs**

In this talk, we'll review common defoliating pests, the damage they cause, their biology, and discuss management approaches for landscape plants.

*PJ Liesch, Entomologist, UW-Madison Extension*

**2:15 p.m. - Ornamental Grasses in Landscape**

Learn about the many perennial ornamental grasses available to Wisconsin gardeners. Mark will share ideas on how to design with grasses and show examples of grasses in the landscape.

*Mark Konlock, Director of Horticulture, Green Bay Botanical Garden*

### Week 4: Wednesday February 23

**1:00 p.m. - Choosing and Comparing Herbicides for Broadleaf Weed Control**

This workshop will review the different broadleaf herbicides and compare their efficacy on common and difficult to control weeds.

*Dr. Aaron Patton, Professor of Horticulture Purdue University*

**2:15 p.m. - Growing Resilient Turf**

Learn about the best performing species and cultivars of grasses for Wisconsin's lawns and landscapes under contrasting conditions.

*Dr. Doug Soldat, Professor, UW-Madison*
